

For new students, initial fear, anxiety prove short-lived

It was *that time* again—back to school!

For many faculty members it was a time to wonder how short the longer summer vacation seemed.

And for new students arriving at Gallaudet, it was a time to wonder at just about everything—at first.

"I was very nervous and shy when I arrived," said freshman Damon Johnson, "But now I feel very excited, meeting new friends—and signing for the first time in my life." Johnson, who attended hearing schools in New Hampshire, plans to major in business. "I chose Gallaudet for better communication and learning opportunities," he said.

Freshman Cynthia Quintana said her initial reaction—"feeling scared in such a big place"—changed during her first week on campus. "Now I love it!" she said. Quintana, who attended the New Mexico School for the Deaf, plans to major in elementary education. "I came to Gallaudet because I'll learn a lot more from professors who sign than I would by using an interpreter."

Linda Liying Chen, a freshman from the Peoples Republic of China, has only been in the U.S. for one month. Chen began signing when she arrived at Gallaudet, and now "feels comfortable signing." She wants to major in studio art and advertising, she said. "I understand more here than I did when I went to hearing schools before. It's nice here—very different."

Sophomore Arthur Moore is no stranger to Gallaudet, having stayed on campus two summers ago while working part-time for the Navy Department—and because his parents are Gallaudet graduates. Until this semester, Moore attended the National Technical Institute for the Deaf (NTID) and took courses at NTID's host school, the Rochester Institute of Technology (RIT). He said he had communication problems at RIT, and that he transferred here for "clearer communication and better relationships with classmates and teachers."

Dirk Albrecht, a freshman in the Honors Program, is another newcomer who is not really new on campus. As a student at the Wisconsin School for the Deaf, Albrecht came to Gallaudet in 1985 for the Young Scholars Program (YSP). "I enjoyed the YSP and learned a lot of physics that helped me when I returned to my school. That's part of the reason I decided to come here—I

Enthusiastic Gallaudet fans cheer on the football team during the Bison's Sept. 6 rout of the Clemson Club. See story on page 4.

Education Specialist degree program designed to meet needs of teachers

The Education Specialist (Ed.S.) degree program, inaugurated on campus this fall, is a response to needs of teachers of hearing impaired students for studies beyond a master's degree, "especially for those who do not wish to pursue a PhD," according to Robert Mobley, chair of the Department of Education.

The 30-35 credit hour program, designed to be completed in three semesters, offers parent/infant, multi-handicapped hearing impaired and reading specializations.

In addition to a masters degree, admissions requirements include prepara-

tion in deaf education and at least three years of successful teaching experience with hearing impaired students. "We emphasize 'successful,'" Dr. Mobley said. "In keeping with the national trend to improve the quality of education programs, our standards will be very high yet within reasonable and possible expectations."

The program's design includes outstanding "export" possibilities. "The program can be 'packaged' and sent to Gallaudet's extension programs, regional centers and any educational institution that does not already provide such advanced training," said Dr. Mobley.

Davis passes rigorous test to become a Certified Professional Secretary

Rebecca Davis, office services supervisor in the Office of the Provost, recently passed the two-day Certified Professional Secretary (CPS) examination given by the Institute for Certifying Secretaries, a department of Professional Secretaries International.

Seven others within the Gallaudet community have achieved CPS status since 1982.

Gallaudet has conducted a special program each year since 1980—including offering courses—to help staff people prepare for the rigorous CPS exam. The six-part exam includes sections on

accounting, behavioral science in business, business law, economics and management, office technology, and office communication and administration.

As an incentive for employees to work for CPS certification, Gallaudet approved a policy in March 1980 that grants a 3 percent salary increase to any secretary who passes three parts of the CPS exam and an additional 3 percent increase to anyone who completes the entire exam. The College will also pay the registration and examination

Microfiche catalog system giving way to 'state of the art'

Searching for printed information on a subject can mean long, frustrating hours spent in a library. Even when a source seems close at hand, as indicated by a library's catalog system, sometimes a book will be missing from the shelf.

The new computerized catalog system being installed in the Gallaudet Library—expected to be in operation by the end of September—is designed to speed searches and permit more complete and effective research on a subject, providing library users with instant data and on-the-spot printouts.

The new catalog system is the result of an intense, eight-month cooperative effort between library personnel and Computer Services (CS) staff. John Day, head librarian, said it is a "state of the art, on-line" system that most libraries do not have. "Computer Services and the library, working together, have done in a matter of months something that takes most academic libraries years to accomplish—and they're often just buying a 'turnkey' system."

A 'turnkey' system is one that includes both the hardware and software, and requires little more than a figurative turn of a key to start up, said Day. Gallaudet's new catalog system is a software package called "DM," manufactured by Battelle, Inc. "We have designed our own catalog and written it, using DM," said Day. "Computer Services has done a fantastic job of working it out in the DM database language."

The library has purchased 12 computer terminals and 9 printers to facilitate searches for library materials. It is anticipated that the terminals will be installed during September in place of the current microfiche catalogs on both the middle and lower levels. Students and others using the terminals can call up a "menu" for authors, titles or subjects, or combinations of those three categories.

"It's going to allow faculty and students to do much more complete searches much more quickly, and to be able to print out what appears on the screen right there at the terminal," said Day.

Until now, searches had to be conducted in three different places, a situation that Day described as "horrible." Everything in the library's collection purchased before 1976 was catalogued in the traditional card format. Materials

feel 'at home,' " he said. Albrecht plans to continue his science studies here.

James Clooney's reasons for choosing to attend Gallaudet also include a desire for improved communication. Clooney, a first-year graduate student in the Educational Technology program, is hearing and wants to learn more signing. He has two deaf cousins who are Gallaudet graduates. A Sea-brook, Md. resident, he has worked

several summers at a camp for deaf students in New York. "I felt overwhelmed my first day here," said Clooney. "But meeting other students and my instructors, and learning my way around, relieved the tension."

Along with most new enrollees at Gallaudet, these students participated in the New Student Orientation program. Some of them also learned sign language in the New Signers Program. Both programs are sponsored by Student Affairs.

Each of these students expressed gratitude for Student Affairs' assistance in making the transition to Gallaudet as smooth and pleasant as possible.

The brain is an organ that starts working the moment you get up in the morning and does not stop until you get into the office.

Gallaudet College is an equal opportunity employer/ education institution. Programs and services offered by Gallaudet College receive substantial financial support from the U.S. Department of Education.

Davis successfully completes exam

continued from page 1

fees and grant administrative leave on examination day.

Applicants must have four years of secretarial experience, all within the past 25 years, and 12 months continuous experience with one employer during the past five years.

Current Gallaudet employees who have successfully earned CPS status are P.J. Sanders, Personnel Department; Irene Tarburton, Office of the President; Virginia Torabi, Dean's Office of the School of Communication; Anna Fowler, English Department; and Deborah Mace, Office of the Provost.

Davis has worked at the College since 1975. When Dr. Catherine Ingold moved from her position of dean of the College of Arts and Sciences in March to take on the duties of provost, Davis, who had worked for Dr. Ingold for more than a year, moved with her.

Anyone interested in applying for participation in the CPS exam can contact P.J. Sanders in the Personnel Department, x5352.

purchased between 1976 and October, 1983, were in the microfiche catalog, and those purchased from 1983 to the present were "on-line" in a computer program called "SIRE."

The library was looking at ways to compile all three catalogs when, simultaneously, the College made the decision to switch campus computers from the DEC-10 system to the VAX system. Because the SIRE catalog was not

compatible with the VAX system, library staff and CS staff conducted research on available software to replace the SIRE catalog. In late December 1985, the DM software was chosen because of its power and capabilities.

"The DM package is, according to several sources, the most powerful text-handling software available," said Day. "It also handles numeric data."

Library users who encounter problems with the new catalog system or who have suggestions will be able to leave messages on the computer by using the same menu. Such messages will be read by the library systems analyst and by CS staff for problem-solving purposes.

Day said that library staff will be able to update the computer catalog much more easily than is currently possible, simply by entering new data into the system. For example, if a book is stolen or moved, there is no way to change what appears on the microfiche film. The DM system will allow instant correction of such information, Day explained.

The system also has the capability—not yet developed—for campus library users to access the catalog from outside the library by using their own terminals. It is possible, said Day, that Gallaudet Regional Centers across the country could tap into the catalog system as well.

The most immediate benefit to library patrons is that materials purchased from 1976 to the present are all located in the DM system, instead of split between the microfiche and the SIRE systems. Older materials, those purchased prior to 1976, will also eventually be converted from the card system to the DM system.

"The new catalog system is really exciting in terms of both the potential of the system and what it lets one do now," said Day.

Correction

The code-a-phone number for the Service Center is x5191. The number is for after-hours, non-emergency, non-dorm-related service.

FOLDA to hold first open meeting

The Friends of Libraries for Deaf Action (FOLDA) will hold its first open meeting on Saturday, Oct. 4 beginning at 9:15 a.m. in the Martin Luther King Jr. Memorial Library, 901 G Street NW. The meeting will feature a workshop on "The Flavor of Freedom" and a storytelling program for children.

Alice Hagemeyer, head of library and information services to the deaf community for the D.C. public library system and president of FOLDA, invites attendance by all persons in the Greater Washington area who are interested in the quality and accessibility

of library programs and services for deaf persons.

Hagemeyer is also encouraging libraries in the area to mark the 225th anniversary this month of the birth of Mason Fitch Cogswell, the "first parent to promote quality education for deaf persons in the New World." Dr. Cogswell was born on September 28, 1761. He played a major role in the 1817 founding of the American School for the Deaf in Hartford. Two years before that, in 1815, he supported Thomas Hopkins Gallaudet's visit to Europe to seek teaching methods for deaf persons in the U.S.

Polly and Dave Peikoff greet Viola Ickes, Lillian Holt and other well-wishers at a reception Sept. 5 to mark Polly's retirement as administrative secretary in the Office of Alumni Relations and Advancement. She was honored for 20 years of service to the College.

Announcements

The Emmy Awards program on NBC-TV Sunday night, Sept. 21, will be closed captioned by the National Captioning Institute with funding from the Lincoln-Mercury division of the Ford Motor Co. "Love is Never Silent," the made-for-TV movie starring Gallaudet graduates Phyllis Frelich and Ed Waterstreet, has been nominated for awards in four Emmy categories.

The Gallaudet Day Care Center still has a few openings for children of faculty, staff and students between the ages of 3½ and 5½. Hours are 7 a.m. to 6 p.m. with full- and part-time slots available. A kindergarten curriculum is being provided this year. For more information, including tuition fees, call or write Gail Solit at x5130/Appleby Bldg.

The Eastern Regional Conference for Educators of the Hearing Impaired will be held Oct. 17 at the Western Pennsylvania School for the Deaf (WPSD). The conference theme is "Kaleidoscope of Strategies: Working Together for Deaf Students." More than a dozen College and Pre-College faculty are scheduled to lead sessions. The conference is sponsored by Pre-College Programs and hosted by WPSD's Center on Deafness.

The Montgomery County Department of Public Libraries offers a series of programs for hearing impaired people. Many other programs can be made accessible to hearing impaired people by arranging for an interpreter at least five working days in advance. One such program is a series of small business counseling clinics beginning in early October and running through May 1987. For complete information call the Special Needs Library, 493-2554 (TDD) or 493-2555 (V).

A package trip to Innsbruck, Austria March 13-21 (coinciding with spring break) is available through Bob Harmon, now retired from the Gallaudet faculty. The trip costs \$995. For addi-

Julian Snow, who recently retired as chief engineer with the TV, Film and Photography Department, pauses in front of a cake displaying a thank-you message for his 18 years of service. Also shown (from left) are co-workers Rick Fansher, Patricia Villone and Kathy Fine.

tional information or an application form, call Harmon at home, 820-6561 (V) or leave a message at x5567 (V/TDD).

Dance classes for both hearing impaired and hearing children will be offered on Saturdays from Sept. 20 to Nov. 22 through the National Dance Academy of the Deaf, part of the Department of Physical Education and Recreation. Classes will include tumbling/ballet for 4- to 6-year-olds and tap, jazz and ballet for 7- to 12-year-olds. For more information, call Sue Gill-Gould, x5492 or x5591.

Pre-College Programs will hold its 2nd Annual Conference on Microcomputers in the Education of the Hearing Impaired Oct. 7-10 at the Greenbelt (Md.) Hilton Hotel. Featured will be pre-conference workshops, exhibits, a software copying service, concurrent presentation sessions and special interest group sessions. For more information call Jean Moore, Pre-College Programs, x5346.

The Jewish Social Service Agency of metropolitan Washington, located on Montrose Road in Rockville, Md., is organizing a deaf parents group. For more details call Libby McKnight at the JSSA, 984-5662 (TDD). Also, Gloria Quintero of the JSSA is setting up a confidential support group for deaf survivors of incest. The group will be limited to six women fluent in ASL. For more information contact Quintero at the same TDD number.

Lacking only the horses and buggies, Faculty Row has resembled a turn-of-the-century Western town during recent work on the road and curbs.

Fullback Robert Wilkins (44) clears a path for tailback Steve McNeese (33) during Gallaudet's 46-14 season opening victory over the Clemson Club. McNeese rushed for 74 yards on 17 carries.

Football season opens on a high note as Bison easily defeat Clemson Club

The College football team opened the 1986 season the same way it began the 1985 season—with a victory.

But two things were very different this year: the size of the victory margin and the reaction of the coaches.

Last year's season opener, a 13-4 win at Shenandoah, did not exactly impress the coaching staff—except for the impressive list of problems that needed to be worked out.

This year's 46-14 victory over the Clemson Club left the coaching staff "far more satisfied," said Head Coach Bob Westermann. "We struggled a little during the first game last year. This year I'm more satisfied with our start; we accomplished more," he said.

Gallaudet led Clemson 32-0 going into the fourth quarter. Forty-three seconds into the final quarter, Clemson scored its first points on an 83-yard run. It was one of the few defensive lapses of the afternoon for the Bison.

Defensive back Chris Von Garrel, a 5-7, 155-pound freshman from Clinton, Md., was one of the stars of a Bison defense that held Clemson to

193 yards total offense. He led the team with 6 tackles and added a fumble recovery.

Freshman fullback Larry Graves (5-10, 225 pounds, from Georgetown, Ky.) rushed for 91 yards on 12 carries. His 55-yard scamper into the end-zone with 8 minutes left in the game was his second TD of the afternoon—and the end of the scoring by either team.

"Offensively, we executed exactly how we wanted to," said Westermann. The Bison rolled up 367 total yards, including 267 on the ground. Freshman quarterback Jimmy Segala (5-10, 180 pounds, from South Deerfield, Mass.) completed 8 of 13 passes for 100 yards and one touchdown. "For his first college football game, I thought Jimmy read the defenses well," said Westermann.

This coming Saturday, Sept. 20, the football team travels to Lancaster, Pa. to face Stevens State Tech. The Bison defeated the Traders 20-9 here last year, but Gallaudet still trails the series 2-1 because of sound beatings in 1982 and '83.

Westermann said that Stevens State is "a well-coached, wishbone-oriented team which could pose a problem for us defensively. We caught them off-balance last year, but this year they'll be ready for us."

Gallaudet's next home football game will be Oct. 4 against Anne Arundel Community College.

Channel 33

Channel 33, the Gallaudet cable television channel for special events, sports, news, education and entertainment, will air the following programs this week from 9 a.m. to 5 p.m.

9-9:30	Beyond Sound: GLAD
9:30-10	Larry & Harvey/ Success
10-10:30	Cocaine Pain
10:30-11	Eye on Washington/ No Better Sound
11-11:30	Music Seen #5
11:30-12	Deaf Mosaic #205
12-12:30	Deaf Mosaic #204
12:30-1	Deaf Mosaic #206
1-1:30	Deaf Mosaic #203
1:30-2	Deaf Mosaic #202
2-2:30	Out of Sight, Out of Mind
2:30-3	Music Seen #1
3-3:30	Music Seen #2
3:30-4	Music Seen #3
4-4:30	Music Seen #4

A tape of the College's Sept. 13 football game against Bridgewater College will be aired at 7 p.m. daily through Thursday.

Viewers are asked to consult the Cable TV Guide which is distributed campus-wide each month.

Among Ourselves

Steven Lotterman, associate professor of audiology; Mary Barry, supervising audiologist; and Fred Brandt, senior research and clinical engineer, presented papers at a recent computer conference sponsored jointly by the British Columbia Health Department and the American Speech, Language and Hearing Foundation. The conference was held at the University of British Columbia in Vancouver.

In addition, two of Dr. Lotterman's software packages were recently published by the College-Hill Press. "Interpreting Pure-Tone Audiometry" and "Interpreting Immittance Results" are computer-assisted instructional materials developed for use by graduate students in the fields of audiology and speech pathology.

Sponsored R&D

The U.S. Department of Education's Office of Special Education and Rehabilitative Services recently distributed its Request for Proposal Applications for new awards under the Research in Education of the Handicapped Program for FY 1987. Available funding is \$7.3 million for the following six competitions:

1. Field Initiated Research Projects. \$2.5 million available for an estimated 25 awards. Deadline: 10/14/86.
2. Synthesis, Validation and Dissemination of Research Methods for Mainstreamed Settings. \$300,000 for one award. Deadline: 10/14/86.
3. Research for Educating Seriously Emotionally Disturbed Students. \$1.2 million for 4 awards. Deadline: 10/24/86.
4. Research Implementation and Demonstration. \$1.9 million for 13 awards. Deadline: 12/1/86.
5. Student Initiated Research Projects. \$150,000 for 20 awards. Deadline: 2/27/87.

6. Educating Learning Disabled and Mildly Handicapped Students in General Education Classrooms. \$1.2 million for 8 awards. Deadline: 2/27/87.

More details may be obtained from the Office of Sponsored Programs, x5401 (V/TDD).

Provided below are application deadlines of selected programs that offer potential grant or contract opportunities for faculty, staff and graduate students. More details on these and other programs of interest can be obtained from the Office of Sponsored Programs, x5401 (V/TDD).

Deadline	Program
10/1/86	NEH: Humanities Programs for Non-Traditional Learners and Improving Introductory Courses
10/1/86	HHS/NIA: Research on Aging
10/1/86	HHS/NIH: FIRST (First Independent Research Support & Transition) Award
10/1/86	Dept. of Justice: Research on the Etiology of Drug Abuse among Ethnic and Minority Juveniles
10/3/86	ED/OSERS: Training Personnel for Education of the Handicapped—Preparation of Related Service Personnel
10/31/86	ED/OSERS: Preparation of Personnel to Provide Special Education and Related Services to Newborn and Infant Handicapped Children
